Candidate surname		Other names
Pearson Edexcel Leve		el 2 GCSE (9–1)
Thursday 6 June 20	24	
Morning (Time: 2 hours 5 minutes)	Paper reference	1EN0/02
English Language PAPER 2: Non-fiction and	reference <b>e</b>	NO.

### Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions in Section A and **ONE** in Section B.
- You should spend about 1 hour and 20 minutes on Section A.
- You should spend about 45 minutes on Section B.
- Answer the questions in the spaces provided
  - there may be more space than you need.

### Information

- The total mark for this paper is 96.
- The marks for **each** question are shown in brackets
  - use this as a guide as to how much time to spend on each question.
- Questions labelled with an asterisk (\*) are ones where the quality of your written communication will be assessed
  - you should take particular care on these questions with your spelling, punctuation and grammar, as well as the clarity of expression.

### **Advice**

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

Turn over

### **SECTION A**

## Reading

	Read Text 1. Then answer Questions 1–3.
	You should spend about 1 hour 20 minutes on the WHOLE of Section A (Questions 1
	Write your answers in the spaces provided.
	rom lines 17-20, identify <b>two</b> activities the writer says are important to nedical schools.
	(Total for Question 1 = 2 marks)
R	ead this extract.
	During the day, the job was manageable, if mind-numbing and insanely time-consuming. You turn up every morning for the 'ward round', where your whole team of doctors pootles past each of their patients. You trail behind like a hypnotised duckling, your head cocked to one side in a caring manner, noting down every pronouncement from your seniors. Then you spend the rest of your working day filling in forms, making phone calls. Not really what I'd trained so hard for.
F	rom this extract, give <b>two</b> tasks completed by the doctors.
Υ	ou may use your own words or quotations from the text.
	(Total for Question 2 = 2 marks)

3	Analyse how the writer uses language and structure to interest and engage the reader.	
	In your answer you should write about:	
	language features and techniques	
	structural techniques	
	the effect on the reader.	
	Support your views with detailed reference to the text.	
		(15)

(Total for Question 3 = 15 marks)

# Read Text 2. Then answer Questions 4–6. Write your answers in the spaces provided. From lines 8-10, identify one feeling Elizabeth has about her friend's suggestion. (Total for Question 4 = 1 mark) From lines 19-22, identify one reason Elizabeth is told she cannot become a doctor.

(Total for Question 5 = 1 mark)

6	In this extract, the writer attempts to demonstrate determination.	
	Evaluate how successfully this is achieved.	
	Support your views with detailed reference to the text.	(15)

# Question 7 is about Text 1 and Text 2. Answer both parts of the question. Refer to both texts in your answers.

### Write your answer in the space provided.

7	(a)	The two texts show people who decide to become doctors.  What similarities do the two people share in these extracts?	
		Use evidence from <b>both</b> texts to support your answer.	(6)

(b)	Compare how the writers of Text 1 and Text 2 present ideas and perspectives about choosing a career.	
	You should write about:	
	the ideas and perspectives	
	<ul> <li>how they are presented</li> </ul>	
	how they are similar/different.	
	Support your answer with detailed references to the texts.	
		(14)

(Total for Question 7 = 20 marks)
TOTAL FOR SECTION A = 56 MARKS

### **SECTION B**

### **Transactional Writing**

# Answer ONE question. You should spend about 45 minutes on this section.

### Write your answer in the space provided.

### **EITHER**

\*8 Write a section for a guide giving advice to young people on choosing a career.

In your section, you could include:

- important things to consider when choosing a career
- how school, college, family and/or friends can help
- how online support and/or resources can help

as well as any other ideas you might have.

\*Your response will be marked for the accurate and appropriate use of vocabulary, spelling, punctuation and grammar.

(Total for Question 8 = 40 marks)

### OR

\*9 'Setting goals is important in every area of life'.

Write an article for a magazine with the title 'My ambitions and setting goals to achieve them'.

In your article, you could include:

- what your ambitions for your future are
- what your goals are
- how your goals will help you achieve your ambitions

as well as any other ideas you might have.

\*Your response will be marked for the accurate and appropriate use of vocabulary, spelling, punctuation and grammar.

(Total for Question 9 = 40 marks)

### **TEXT 1**

Extract from 'This is Going to Hurt: Secret Diaries of a Junior Doctor' by Adam Kay (2017).

In this edited extract from a collection of his diary entries, Adam Kay shares his experience of deciding on medicine as a career.

At sixteen, your reasons for wanting to pursue a career in medicine are generally along the lines of 'My mum/dad's a doctor' or 'I want to cure cancer'. Reason one is ludicrous, and reason two would be perfectly fine were it not for the fact that's what research scientists do, not doctors. Besides, holding anyone to their word at that age seems a bit unfair.

5

Personally, I don't remember medicine ever being an active career decision. I went to the kind of school that's essentially a sausage factory designed to churn out medics, lawyers and cabinet members; and my dad was a doctor. It was written on the walls.

Because medical schools are oversubscribed ten-fold, all candidates must be interviewed, with only those who perform best under a grilling being awarded a place. It's assumed all applicants are on course for straight As at A level, so universities base their decisions on non-academic criteria. This, of course, makes sense: a doctor must be psychologically fit – able to make decisions under a terrifying amount of pressure, able to break bad news to anguished relatives, able to deal with death on a daily basis. They must have something that cannot be memorised and graded: a great doctor must have a huge heart and a distended aorta\* through which pumps a vast lake of compassion and human kindness.

10

15

At least, that's what you'd think. In reality, medical schools don't care about any of that. They don't even check you're OK with the sight of blood. Instead, they fixate on extracurricular activities. Their ideal student is captain of two sports teams, the county swimming champion, leader of the youth orchestra and editor of the school newspaper.

20

Imperial College in London were satisfied that my distinctions in grade eight piano and saxophone, alongside some theatre reviews for the school magazine, qualified me perfectly for life on the wards, and so in 1998 I packed my bags and embarked upon the treacherous six-mile journey from Dulwich to South Kensington.

As you might imagine, learning every single aspect of the human body's anatomy and physiology, plus each possible way it can malfunction, is a fairly gargantuan\*\* undertaking. But the buzz of knowing I was going to become a doctor one day – such a big deal you get to literally change your name, like a superhero or an international criminal – propelled me towards my goal through those six long years.

25

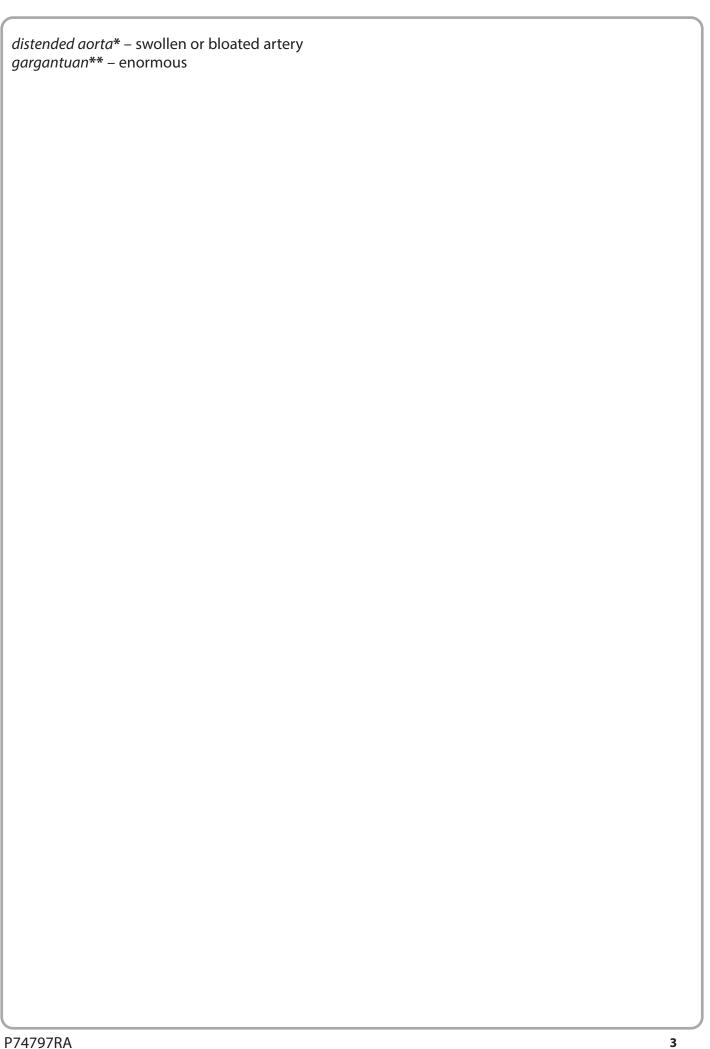

Then there I was, a junior doctor. It was finally time to step out onto the ward armed with all this exhaustive knowledge and turn theory into practice. My spring couldn't have been coiled any tighter. So, it came as quite the blow to discover that I'd spent a quarter of my life at medical school and it hadn't remotely prepared me.

30

During the day, the job was manageable, if mind-numbing and insanely time-consuming. You turn up every morning for the 'ward round', where your whole team of doctors pootles past each of their patients. You trail behind like a hypnotised duckling, your head cocked to one side in a caring manner, noting down every pronouncement from your seniors. Then you spend the rest of your working day filling in forms, making phone calls. Not really what I'd trained so hard for.

35

2 P74797RA

### Read the text below and answer Questions 4–7 on the Question Paper.

### TEXT 2

Extract from 'Elizabeth Blackwell: A Doctor's Triumph' by Nancy Kline (1997).

Elizabeth Blackwell was born in Bristol in 1821. Her family emigrated to the United States of America when she was a child and she went on to become the first woman doctor in America. In this edited extract from a book about her life, she is a teacher considering this new career.

She remarked to her sick friend that she had been studying German, metaphysics\*, and music, subjects she loved; so why did they leave her unsatisfied and restless?

"Elizabeth," her friend said, "you're fond of study. You have health and leisure. Why not study medicine?"

This was an astonishing suggestion. Women did not study medicine in 1845.

"If I could have been treated by a lady doctor," said the friend, "my worst sufferings would have been spared me."

The thought of becoming a doctor struck Elizabeth as preposterous. Her reaction to her friend's idea was revulsion: "The very thought of dwelling on the physical structure of the body and its various ailments filled me with disgust."

At the age of six, Elizabeth had told her older sisters that she didn't know what she would be when she grew up, but it would be something hard. Given her character—shy, squeamish, exceedingly proper, repulsed by the physical, and especially by disease—medicine would be the hardest of all the professions she might choose. Given her character—tough, obstinate, constantly self-challenging, forever testing her own limits—the fact that medicine would be hardest for her recommended it.

Elizabeth began to broach the subject of medicine to those closest to her.

"What would you say to my becoming a doctor?"

"Impracticable. You won't get into medical school. If you do, you won't have the money to pay for it. Not to mention the time—it takes years of study. Then afterwards, how will you get patients? People would never consult a woman doctor. Forget it. It can't be done. There are too many obstacles."

Immediately, Elizabeth's interest in the project soared. I can't do it? I shall do it.

With each new negative response, she dug her heels in deeper: *Try to stop me*.

At that time, a growing number of "irregular" medical schools allowed women to study, but these schools existed on the margins of society. Elizabeth refused to be marginalized in this way. She was ready to fight for the opportunity to study the most respected, scientific medicine available. She was determined to go to a mainstream medical college.

Elizabeth sailed out of Charleston in May, 1847, bound for Philadelphia, the center of American medicine at the time. She took with her the savings she had so "carefully hoarded", as she herself put it.

It was time to storm the gates of medical school.

**4** P74797RA

10

15

5

20

25

30

Her sponsor was Dr. Jonathan M. Allen, with whom she now began to study anatomy privately. To introduce her to the intimate workings of the human body, which threatened to repulse her, Dr. Allen had the excellent taste to begin his lessons with the human wrist. She later wrote, "The beauty of the tendons and exquisite arrangements of this part of the body struck my artistic sense."

35

Elizabeth was getting interested. New knowledge gave her a new angle of vision. She was beginning to see the world as a physician sees it. At this stage of her education, she was truly confronting her fears and finickiness, so that she would be able to plunge into medical school, excelling at it, when finally they let her. She had moved from books to anatomical models, from cadavers\*\* to living patients. She was becoming ready to become a doctor.

40

metaphysics\* – a type of philosophy cadavers\*\* – human bodies
